Waterproof

The smarter way to upgrade your walls

Beautiful. Durable. 100% waterproof.

Create beautiful spaces with Naturepanel® decorative wall panels, the luxurious and modern way to decorate your home. Our wall panel collections come in a range of finishes, offering endless design possibilities.

Moisture, spills, scratches, and everyday life can take a toll on traditional walls. Naturepanel changes everything about the renovation process, delivering high-quality, luxurious-looking wall panels that are easy to fit and require minimal upkeep. Naturepanel delivers the look you love with performance you can count on for years to come.

Being 100% waterproof and durable, Naturepanel wall panels are suitable for wet areas such as bathrooms and shower cubicles, as well as high-traffic areas such as dining and living rooms. All panels are easy to clean and quick to install.

Upgrade your home with no mess, stress, or high renovation costs

Our story

A proud manufacturing heritage...

Naturepanel is a waterproof wall panel product from Grant Westfield. Since 1881, Grant Westfield has been dedicated to manufacturing exceptional interior building products in Edinburgh, Scotland.

Throughout the course of over 145 years, successive generations have upheld a shared passion for craftsmanship, high quality, and innovation. While Grant Westfield today focuses solely on the wall panel market, our diverse product history includes:

- Lobster pots for the shipyards in the early 20th century
- Components for Spitfires in World War II
- Restroom systems for major UK airports and the House of Lords

With a future driven by innovation and local partnership...

In 2003, we started to manufacture laminate wall panels, growing to produce over 10 million square foot of wall panels last year in the UK. Naturepanel has evolved with technology to create an unrivaled combination of design features, performance, and sustainability.

Naturepanel is exclusively distributed in the US by Clayton Supply, the vertically integrated supply chain division of Clayton Home Building Group. Founded in 1956, Clayton is a leading single-family, values-driven home builder committed to *opening doors to a better life* through attainable homeownership. The company's portfolio includes a comprehensive range of site-built, modern manufactured, park models, CrossMod® and modular housing. Clayton's national footprint of 19 supply locations and 41 home building facility locations ensures Naturepanel is always nearby and readily available.

Our reputation is built on the exceptional quality of our wall panels. Our commitment to excellence extends across all aspects of our business.

The future of waterproof walls is here

Quick & easy to install

Transform your space in a fraction of the time with long-term durability.

Can be installed over tiles

Our market-leading 1/4" tolerances makes it easy to fit over uneven surfaces.

Grout-free installation

With no grout lines, enjoy 5x faster installation than traditional tiles.

Save time & money

Skip expensive tile work and labor-heavy renovations.

Mold resistant

Engineered to protect your walls from moisture damage and mold.

Easy to keep clean

No more scrubbing - just wipe clean and enjoy.

Fully waterproof

Naturepanel isn't just water-resistant - it's completely waterproof.

Hydrolock® joint

Seamless installation in rooms, including wet rooms and bathrooms.

30-year warranty

Install it once, enjoy it for years to come.

Panels vs. Tiles

Style and design are key to creating the bathroom of your dreams. Naturepanel luxurious bathroom wall panels offer a modern alternative to tiles that are stylish and on trend. Being 100% waterproof, Naturepanel is perfect for all living spaces, including shower and tub surrounds.

Surface Etching Technology

For our Tile and Wood collections, we etch into the top layer of the laminate surface to reveal a sublayer.

For Tile, this creates the tactile appearance of grout, and for Wood it creates the aesthetic of acoustic wall panelling or painted timber - without the maintenance associated with any of these materials or impacting the waterproof and wipe-clean surface feature.

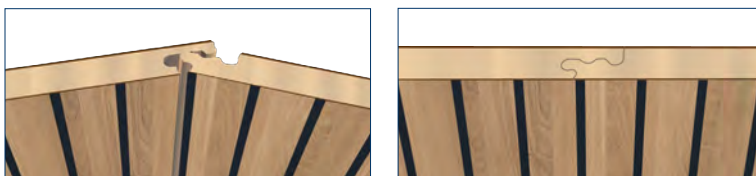

Top layer of face laminate etched to show 'shadow line' sub-layer, maintaining waterproof, durable performance

Precision engineered Hydrolock® joint

Whether you're hiring a contractor or tackling a DIY project, Naturepanel makes transformation simple. We created Hydrolock® to enhance the visual impact of our wall panels. Precisely engineered, the Hydrolock® edge allows panels to be joined together for a flush, barely visible connection.

- Provides greater precision and a superior finish compared to the traditional T&G slot joint.
- Features a market-leading 1/4" tolerance, for fitting over uneven surfaces.
- Creates a smooth, almost seamless expanse of waterproof walls.
- Quick and easy to install.

10

Wood

Wooden planks are a popular choice for modern and minimal interiors.

The long and repeating strips of wood help accentuate a room's height and reflect the ever-popular Japandi trend for a cozy and functional space.

Grained Stone Green Shiplap

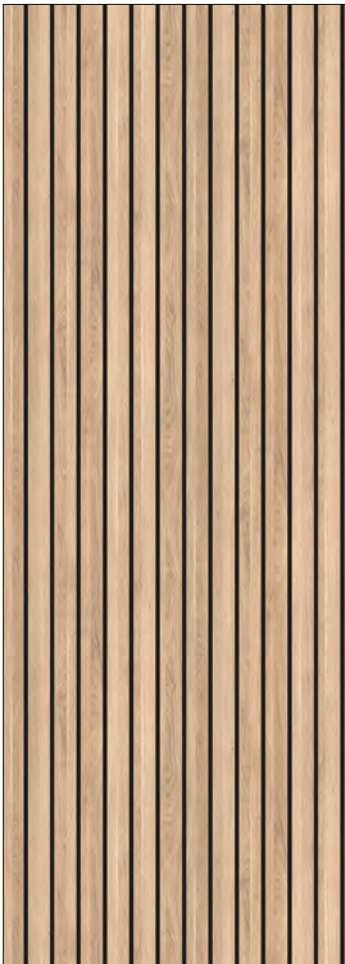

Wood Decors

This beautiful wood effect brings warmth and texture, creating that effortless organic look your home has been craving. Each Naturepanel wood décor showcases a unique and natural charm, with delicate integrated sapwood elements and fine knots to create an authentic appearance.

Wood Slat

Bleached Cuneo Oak (left), Brown Cuneo Oak (right)

The light wood brings a sense of warmth and rhythm to a space, combining natural texture with a clean, contemporary finish. The subtle grain and soft color help brighten interiors while adding depth and visual interest.

Each panel has 14 slats, which are 1 3/8" wide with a 1/4" shadow gap between each slat. Full panel is 22 3/4" x 94 1/2".

Shiplap

Brown Cuneo Oak (left), Grained Alpine White (right)

Originally used to weatherproof ships, barns and farmhouses, today shiplap is used as a rustic, country-style interior décor.

This collection offers an on-trend finish reminiscent of bright, airy homes with lots of character.

Each panel has five slats, which are 4 5/8" wide with a 3/32" shadow gap between each slat. Full panel is 22 3/4" x 94 1/2".

Create a striking
centerpiece that's
elegant and timeless

Grained Angora Grey (left), Grained Stone Green (right)

Our Shiplap range comes in five different colors, allowing you to choose a decor that feels most authentic to you.

Transform your interiors with our wood panels - a minimalistic blend of nature and functionality at its finest. Create a cozy country farmhouse feel in your room for a space you won't want to leave.

20

Tile

If you love the appearance of traditional tiles but are tired of living with the maintenance of grout, the Naturepanel Tile Collection is for you. Using the very latest in manufacturing technology, we etch a 3/32" pale grey grout line into our Tile Collection décors. Enjoy the elegant look of tiled walls without the upkeep or lengthy installation time.

White Grey Subway & Valmasino Large Tile

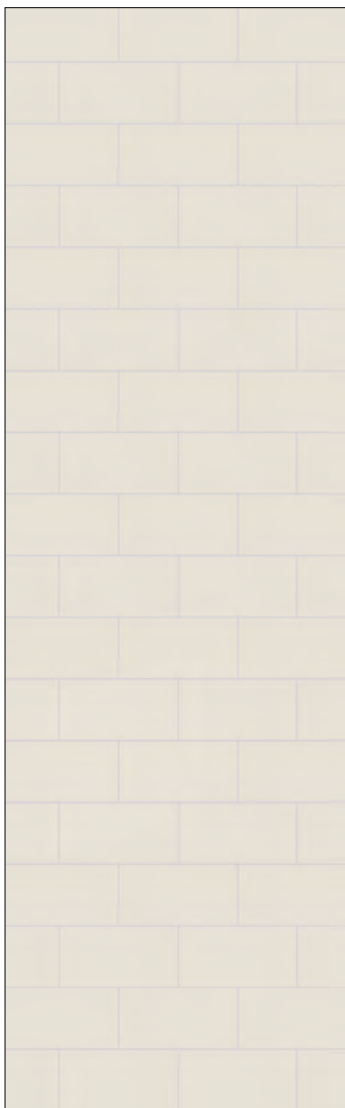

Tile Decors

Available in seven beautifully curated decors and two distinctive formats, the Tile collection offers a breadth of interior possibilities for your home. This collection has been designed to create the illusion of depth and looks stunning in both spacious and compact bathrooms. Explore our range of neutrals, marbles and mineral effects.

Subway

White Grey (left), Sage Green (right)

Subway tiles are a timeless tile design reminiscent of New York City's subway. This pattern looks great when installed half-height and also as an eye-catching feature wall.

Individual tile size is 7 ½" x 3 13/16" with a 3/32" grout line between each tile. Full panel size is 22 ¾" x 94 ½".

Large Tile

Cremona Marble (left), Valmasino Marble (right)

Transform your bathroom into an oasis of tranquility. From textured stone to creamy marble, the neutral colors in the Large Tile Collection are designed to evoke a sense of peace.

Each panel has 6 individual tiles which are $22 \frac{3}{4}'' \times 15 \frac{3}{4}''$ with a $\frac{3}{32}''$ grout line between each tile. Full panel size is $22 \frac{3}{4}'' \times 94 \frac{1}{2}''$.

Create a soothing,
peaceful spa-inspired
bathroom design

Crystal Marble (left), White Gypsum (right)

Large Tile comes in a beautiful mix of marbles and stones, perfect for creating that luxury look without the cost or lengthy installation. From the grey nuances of Valmasino to the lively Terrazzo, these marble décors have a beautiful variation in shades and textured finish.

The Pure collection includes on-trend designs and textures for a sleek, elegant look. Explore the expanse of stone in your home, with grout-free walls that cover the entire wall.

This panel is available in 22 $\frac{3}{4}$ " x 94 $\frac{1}{2}$ ".

Transform your walls
into statements with
organic textures

White Terrazzo Pure (left), Valmasino Marble (right)

These decors provide the appearance of real stone without the associated price tag. Not only are our stone effect panels great value, their lightweight nature makes them quick and easy to install unlike real stone paneling.

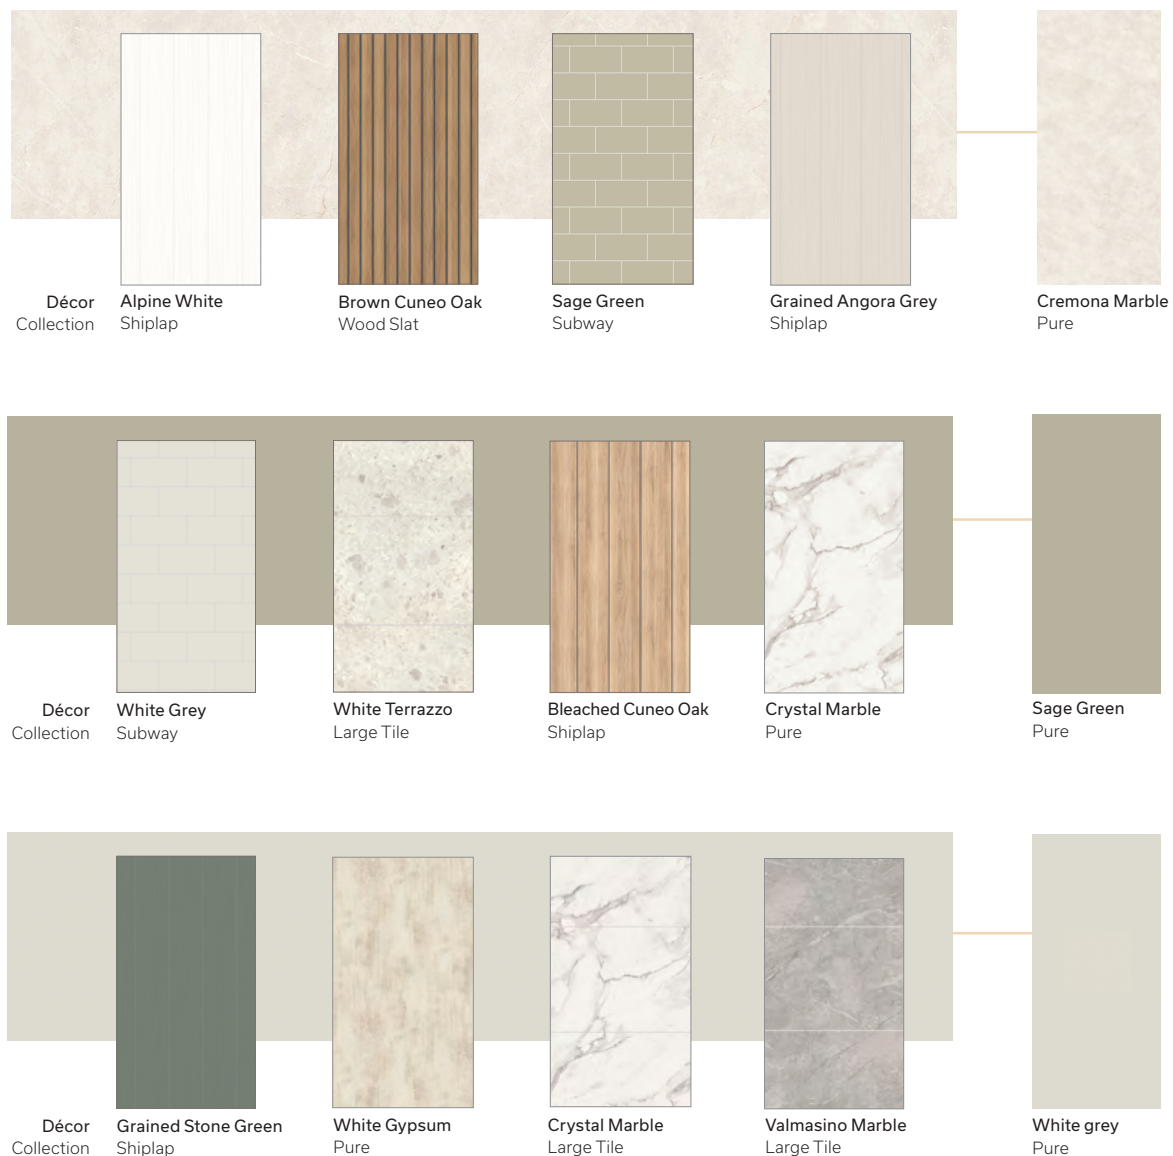

Style Guide

With our unique Hydrolock® locking joint, it's never been easier to mix and match your favorite panels to create a space you love.

Create the perfect pairing with decorative panels from our Slats and Subway collections to create a design that is uniquely yours. Alternatively, mix feature panels from our Large Tile Collection with more neutral tones such as White Terrazzo for stunning full room solutions.

We've carefully selected our favorite combinations to help you create your dream bathroom. Here are some pairings we think you'll love!

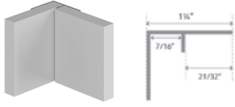

Profiles

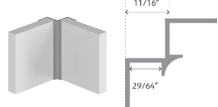

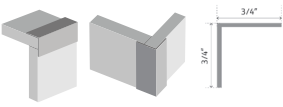

Add your finishing touches

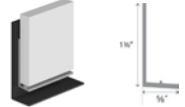

To finish edges or to join panels in a corner, the appropriate profiles must be used. Use the table to help you select the right profiles for your design.

Vertical profiles are available in 96½" long aluminum.

End Cap Profile
Matt Black

Invisible Corner Type 101 MPIHCML	End Cap Type C MPEC
	
✓ No visible aluminium ✓ Seal gap with colored silicone	✓ Discreet ¼" visible face ✓ Can be used vertically (outside a shower enclosure) or horizontally (half height paneling outside of the wet area or splashbacks)

Internal Corner Type A MPIA	Angle Profile Type 102 MPAP
	
✓ Curved visible fascia ✓ Greatest tolerance for non-square corners	✓ Squared visible fascia ✓ Fitted over the face/end of two panels

Base Profile Type X MPBPSA

✓ Used in wet rooms, typically 3 15/16" off the floor, with floor covering fitted behind the profile up-stand. ✓ Aluminium

Please note: All 3D drawings are a generic representation of the profile type.

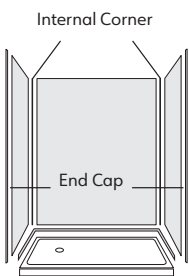

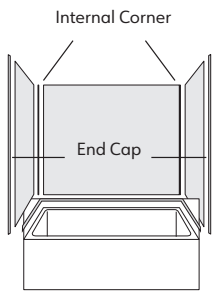

Dimensions specific to each range are shown on the line drawings.

Available Colors

	Matt Black		Polished
	White		Brushed Brass
	Mill finish		

Installation

A key feature of Naturepanel is design versatility. Take a look at the style guide for mixing feature panels for stunning full-room solutions. However, where a customer simply requires panels for the wet area, here is what you will need:

		2-sided walk-in shower		3-sided walk-in shower		3-sided bath	
							
Pan/Tub Size		36" x 36"	48" x 36"	48" x 36"	60" x 36"	48" x 36"	60" x 36"
Panel size	22¾" x 94½"	4	4	6	6	6	6
Profiles	Internal/Invisible Corner	1	1	2	2	2	2
	End Cap	2	2	2	2	2	2

Tile panel design

The above panel quantities are based on the most economic installation of panels. For the Large Tile format, if a particular layout or symmetry is desired, additional panel(s) may be required.

Adhesive

A high-grab polymer adhesive should be used to adhere panels to the wall or substrate. A typical sized cartridge will cover two panels.

Silicone caulk

High performance bathroom sealant must be used at all joints, including the base (embed the panel in silicone caulk), in the Hydrolock® joint (a narrow bead on the front of the joint), and in the aluminum profiles. A typical cartridge will cover around 25-30 linear feet, depending on bead size.

Installation tips

Match your profile color to your shower enclosure or shower fittings

Panel cut offs can be used behind sinks for a coordinated look. Just ensure you seal all exposed edges with profiles and silicone

Naturepanel can be installed vertically or horizontally and can be easily cut to the desired size using a hand or power saw. Vertical panels give the illusion that the walls and ceilings are taller, while horizontal panels are unique and give the illusion that a room is larger and more spacious.

Sustainability

EPD

We're proud to have obtained an Environmental Product Declaration (EPD) for all our UK collections. The EPD covers environmental impacts from cradle to grave and has been independently verified to help you choose products that support carbon emission reduction.

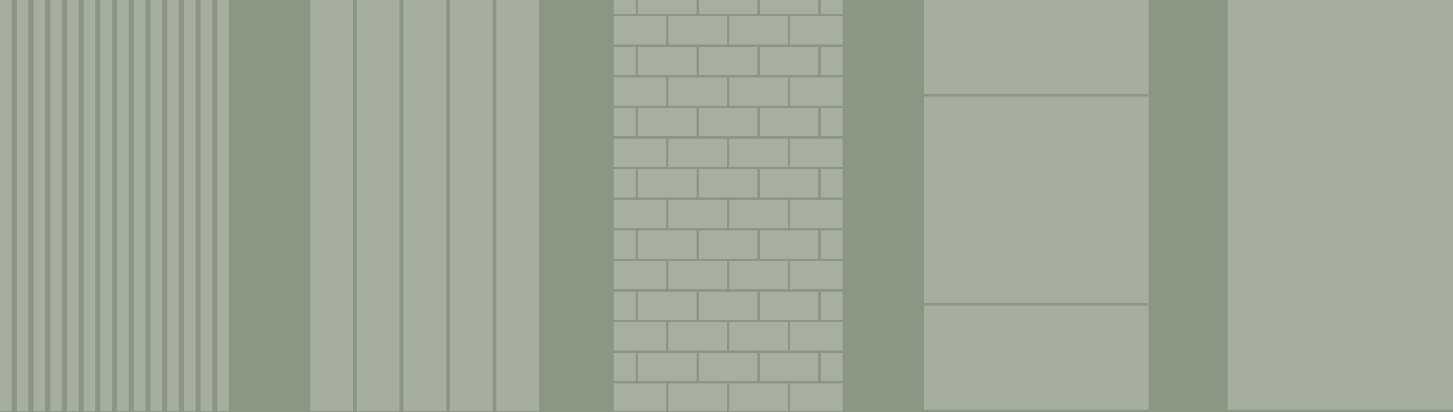

Recyclable product

Our panels are 100% recyclable, and we recycle 99% of post-production waste into biomass materials. We've also achieved ISO 14001® certification, demonstrating our commitment to the environment.
